

## Re-Inking your Maxlight Stamp

To re-ink your Maxlight stamps please follow these instructions.

Remove the handle and place the required amount of ink in to the back of the stamp. Sizes do vary, so the amount of ink is determined by size/model number. Let the stamp sit overnight. If the impression is still too light, repeat.

Always re-ink with the same colour and type of ink as the original stamp.

Leave stamp in upright position after inking.
